The Hidden Beauty of Maps

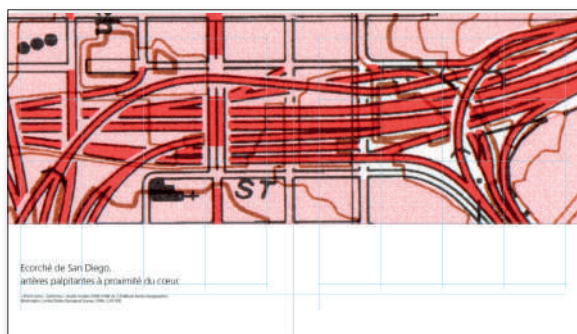

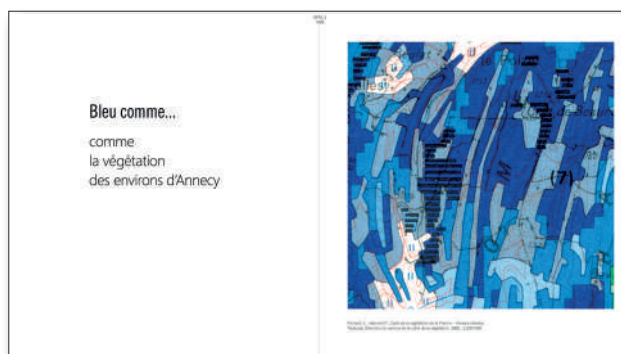

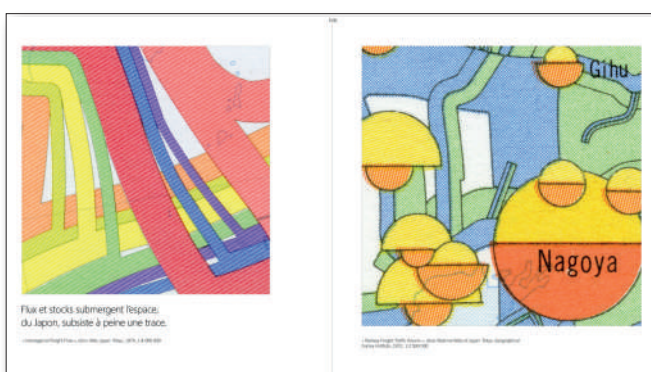

La Beauté cachée des cartes

23 x 25 cm • 288 pages • Hardcover
9 000 words approx. • 150 illustrations
32 € • November 2025

In *The Hidden Beauty of Maps*, Jean-Luc Arnaud explores the intricate artistry found in both ancient and modern cartography. Focusing on the elegance of map design, he highlights how geography and art intertwine. Through a curated selection of maps, the author uncovers the beauty hidden in each detail, offering a fresh perspective on the craftsmanship behind mapmaking.

Jean-Luc Arnaud, a historian and architect, is a Research Director at CNRS and specializes in the history and representation of urban spaces. He founded an online platform CartoMundi, focusing on cartographic heritage, and has significantly contributed to understanding cartography in the Mediterranean area.

- Highlights the unique details that make maps visually captivating.
- Offers a fresh perspective on geography, highlighting its artistic value.

Cover soon available

Creatures in Cartography (15th-18th century)

Les Animaux dans la cartographie (XV^e-XVIII^e siècle)

19 x 23 cm • 250 pages • Hardcover
63 000 words approx. • 100 illustrations
29.90 € • November 2026

In the 15th century, animals filled the blank spaces on maps. Over time, naturalistic imagery took precedence, and by the 17th and 18th centuries, animals had evolved into powerful political and symbolic figures.

This richly illustrated atlas explores five major themes:

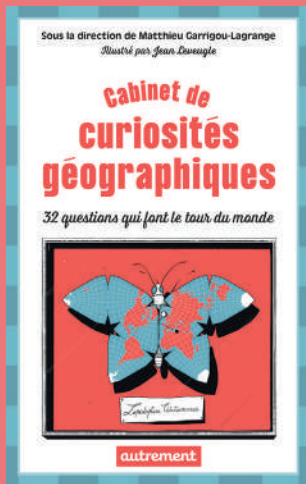

- Animals as placeholders in early cartography
- Naturalistic depictions emerging from grand expeditions
- Animals as cultural and symbolic markers of territories
- The relationship between animals, humans, and geography (both domesticated and wild representations)
- The political role of animals and maps in shaping worldviews

Featuring detailed spotlights on fascinating creatures like the opossum and rhinoceros, this work presents a visual journey through over 1,300 maps, cataloging more than 5,000 animal depictions. A captivating blend of history, cartography, and zoology.

Émilie Dreyfus is a geographer specializing in the history of cartography. She holds a PhD on the subject and currently works as Head of Heritage Collections at the Chambéry Library.

• **A visual journey through 1,300 maps and 5,000 animal depictions that transformed exploration and geography.**

Geographical Fun Facts

32 Questions that Explore the World

Cabinet de curiosités géographiques

32 questions qui font le tour du monde

13.5 x 22.4 cm • 224 pages • Softcover
6 500 words approx. • 32 illustrations
19.90 € • May 2025

Can the Earth open beneath our feet? Where is the South? Can we map clouds or emotions? What caused the Dead Sea to die? Mathieu Garrigou-Lagrange, a journalist at *France Culture*, consulted top experts – historians, geographers, and sociologists – for each topic. The result is a collection of fascinating and accessible miscellanies, humorously illustrated by Jean Leveugle. An engaging read for geography enthusiasts and newcomers alike, offering a fresh take on the subject.

Matthieu Garrigou-Lagrange, journalist and writer, has produced numerous shows for radio.

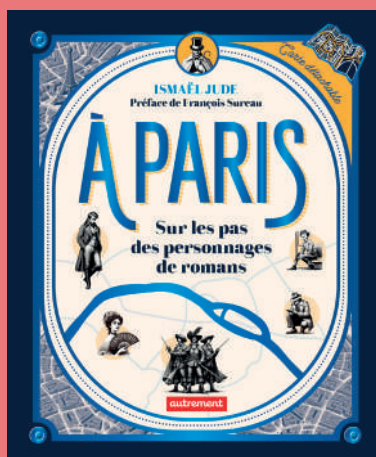

Jean Leveugle is a geographer and urban planner. He is the author of *Curiosités cartographiques* (Autrement, 2022) and the comic book *Geographia* (Futuropolis – BNF, 2024).

- Insights from 32 specialists, including historians, geographers, and sociologists.
- A fascinating journey through unexpected "pick & read" geographic topics.

What is geography for?
Did the ancient Greeks take time to admire the landscape?
How many continents are there?
Geography and religion: were they the same fight for the ancients?
What is the oldest known map?
Since when do we know the Earth is round?
Was geography taught in the Middle Ages?
Could the European Union have been born five centuries earlier?
Is geography a matter for men? Can states buy territories?
Are there still places to explore on Earth?
How were the departments named?
Why is there a small piece of Russia in Europe?
Why do Americans abandon city centers?
Where is the South?

Can the Earth open up beneath our feet?
Is the Arctic a continent or an ocean?
Do maps lie to us?
Does the city have a gender?
Artificial islands: the new Eldorado?
The Moscow ghost metro: reality or legend?
Is mountaineering the sport of capitalism?
Why do capitals get moved?
Can we map our emotions?
Why do we vote differently in cities and the countryside?
Can you become an urban planner by playing video games?
What kind of geographer was Jules Verne?
Can we map clouds?
Who has a say on the Arctic?
Saint-Exupéry, geographer of the soul?
What is the Dead Sea dead from?
Can a flood be...?

In Paris. On the Trail of Literary Characters

À Paris. Sur les pas des personnages de romans

230 x 280 mm • 192 pages • Hardcover
50 000 words approx.
39 € • November 2024

A unique atlas to guide through the footsteps of iconic literary characters who have wandered the streets of Paris.

From the vibrant escapades of Nana and Gavroche to the adventurous tales of Asterix, Zazie, Nestor Burma, Adèle Blanc-Sec, and Adamsberg, each character shares a unique bond with the city. Their narratives weave through the Paris of their times, unveiling facets of the city that range from the widely celebrated to the hidden gems, from the playfully vibrant to the deeply personal. This meticulously crafted atlas brings their adventures to life, mapping out each character's path across Paris, allowing not only to follow their journeys through the pages but also to step into their world and walk the paths they once trod. Discover the City of Light as never before, through the eyes of its most memorable literary inhabitants.

Ismaël Jude is the author of a number of plays, including *Vivre dans le désordre* (ed. Verticales, 2019) and *Grief* (ed. Verticales, 2022).

Maxime Salles is a cartographer.

Preface by **François Sureau**, of the French Academy.

• Detachable map included.

Historical Atlas of Displaced Capitals

70 Capitals that Have Migrated Over the Centuries

Atlas historique des capitales déplacées

70 capitales qui ont migré au fil des siècles

23 x 19 cm • 288 pages • Hardcover
90 000 words approx. • 80 illustrations
29.90 € • June 2025

Capitals, often seen as timeless symbols of national power, have undergone dramatic transformations throughout history. Many have been abandoned, relocated, or entirely rebuilt due to rising seas, political conflicts, or the pursuit of modernization. From Kyoto to Tokyo, Abidjan to Yamoussoukro, and Rio de Janeiro to Brasília, this title traces the fascinating stories of cities that lost—or gained—their status as capitals. Forgotten urban centers reemerge, revealing the complex forces that shape nations. Enriched with beautifully crafted vintage-style maps, this title offers a compelling journey through the shifting landscapes of global capitals.

Frank Tétart holds a PhD in geopolitics and is a lecturer.

Pierre-Alexandre Mounier is a graduate of the Toulouse Institute of Political Studies and a lecturer.

• A richly-illustrated title with vintage-style maps.

Changing Capitals to Invent a Future
Relocating to Gain Independence
Entering Modernity
Abandoning Capitals to Recentralize or Open Up
Power Recentralization
Downgrading for Greater Neutrality
A Move for Better Governance
Changing to Survive
Relocating in the Face of Rising Threats
Temporary Capitals (Awaiting National Unity)
Capitals in Wartime
Failed, Deposed, or Contested Capitals
Ephemeral or Abandoned Capitals
Contested Capitals / Power Rivalries

Map Voids

When the void lights up

Le Blanc des cartes

Quand le vide s'éclaire

190 x 230 mm • 128 pages • Hardcover
8,800 words approx.
29 € • April 2024

When the void lights up.

What do the blanks on the maps say or not say? Between naive omissions, lack of data and invisibilisation for political or cultural purposes, silences are not neutral and also have an effect on our imaginations.

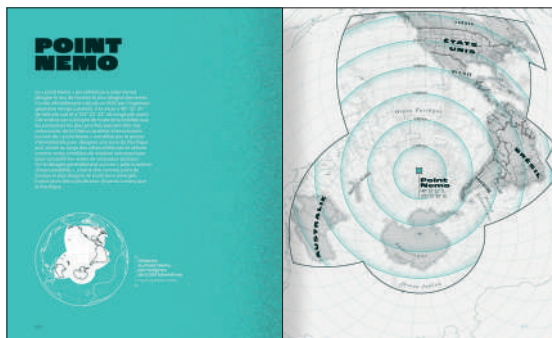

The authors of this atlas reveal a new world to us, revealing geographical margins and the confines of digital data: demographic 'voids' or occupied zones that disappear from the maps... the unthought of geography is revealed.

This is a book for thinking about geographical representations and the information conveyed by maps.

Sylvain Genevois is a lecturer at the University of La Réunion. A geographer by training, his work focuses on the didactics of geography and digital technologies.

Matthieu Noucher is a geographer, researcher at the CNRS and deputy director of the French research network in geographic information sciences.

Xemartin Laborde is a cartographic journalist at Le Monde newspaper.

From data flood to data deserts

- Google Street View, a fragmented vision of the world
- The seabed, a still incomplete exploration
- OpenStreetMap, a world map?
- When emptiness says more than fullness
- Invisible territories
- Under the cloud voids

Making the map voids talk

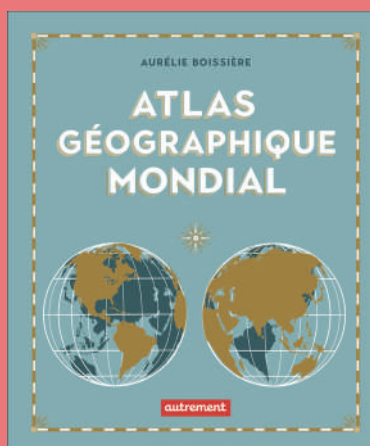

- Null Island
- Latitude Zero
- Point Nemo
- "Null Value", "Null countries"
- Isohypse zero
- Zero points

Representing emptiness

- No one lives here
- No one resides here anymore
- No one is connected here
- Nothing to see here?

Revealing or hiding the void

- Quiet zone
- Fog of war
- Filling the voids of the map
- Making relegation visible
- Making the voids exist
- AIS beacons and illegal fishing
- Forbidden aerial flyover

World Geographical Atlas

Atlas géographique mondial

190 x 230 mm • 288 pages • Hardcover
32 € • July 2024

An atlas for the whole family, to dream about future journeys or to marvel at, but above all to understand the world and its issues.

The book is divided into main sections:

- world maps on major themes (politics, natural environments, volcanism, etc.)
- each continent and ocean, including both political and physical maps.

The atlas also takes a more original approach to the world:

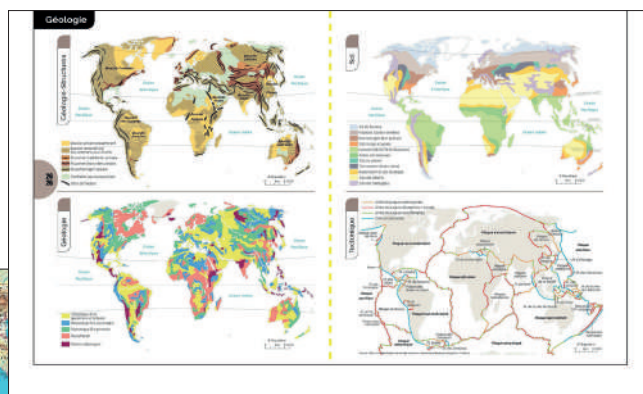

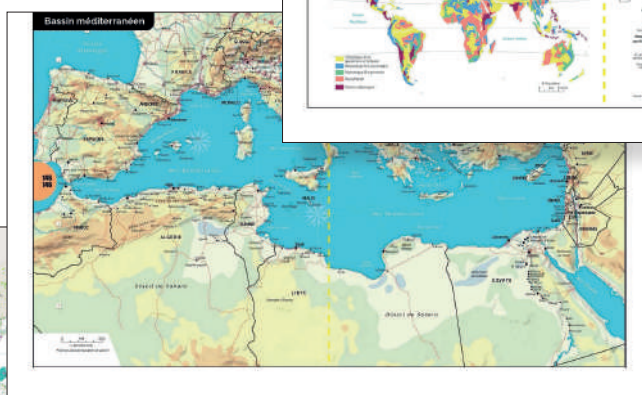

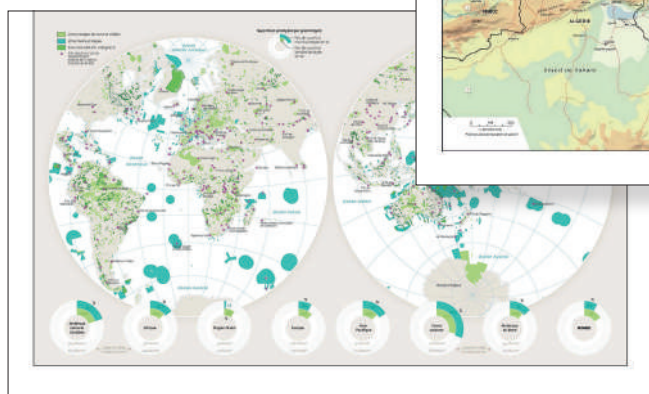

- new and useful framings (the Caribbean Sea, the Indo-Pacific, etc.)
- rarely-seen representations (globes showing the antipodes, cities crossed by the Equator, etc.).

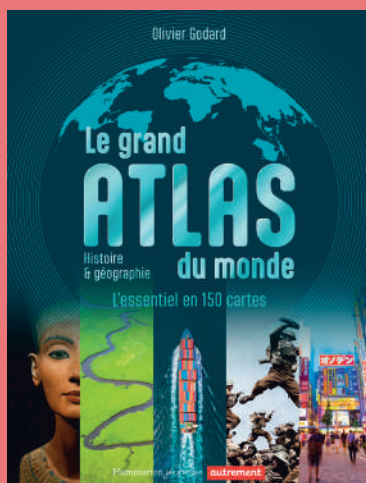

A whole new way of seeing the world!

Aurélie Boissière is a cartographer and has worked for many years on the atlases in the collection. She is also a lecturer in cartography at the University of Paris.

- A reference atlas for the whole family to explore together.

World
France
Europe
Africa
Middle East
Asia

Oceania
Polar regions and oceans

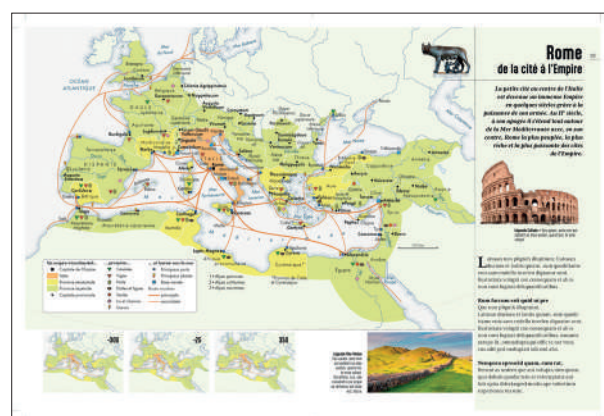

The World Atlas: History & Geography in 150 maps

Le Grand Atlas du monde : histoire et géographie

212 x 262 mm • 160 pages • Hardcover
24.90 € • September 2025
From age 9+

This atlas is designed to delve into both ancient civilizations and modern geopolitics in a format that is both clear and captivating for young readers. Offering a thorough perspective on world history, cultural variety, and geographical marvels, students (10-15 years old) will gain understanding through detailed maps and pertinent analyses. Serving as an essential tool for both educators and learners, it enables the investigation of past events and present-day complexities.

Olivier Godard is a history and geography professor, one of the founders of the 'Concours Carto' association which organizes an international cartographic competition for students around the globe.

ATLAS OF WARS SERIES

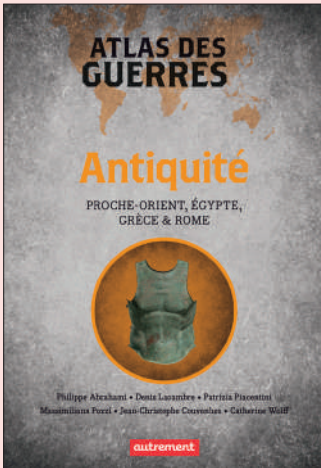

The «Atlas des guerres» series by Autrement provides a comprehensive visual and historical exploration of major global conflicts. Each volume combines detailed maps, timelines, and analysis to offer readers a clear understanding of the causes, key events, and impacts of wars throughout history.

17.24 x 24.5 cm

192 pages

Softcover

29.90 €

Spring 2025

September 2025

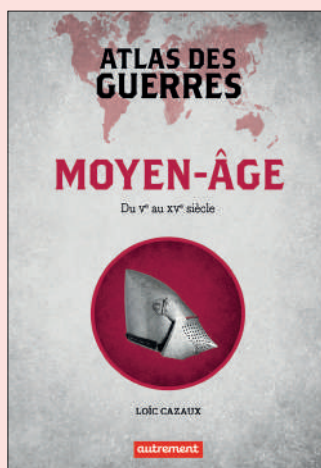

An Atlas of Wars in the Antiquity

Philippe Abrahamsi, Denis Lacambre, Patrizia Piacentini, Massimiliana Pozzi, Jean-Christophe Couvenhes, Catherine Wolff

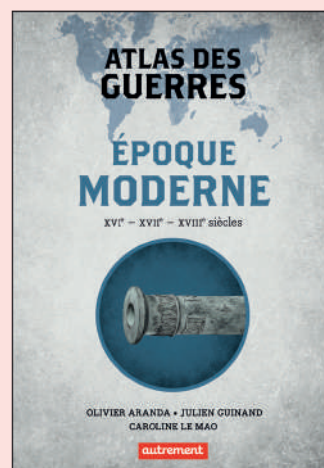

This volume uniquely combines Mesopotamia, Ancient Egypt, Greece, and Rome, offering fresh insights into Late Antiquity's wars and military strategies. It highlights the power struggles from Tigris-Euphrates rivalries to Rome's conquest of the Mediterranean.

An Atlas of Contemporary Wars

Alya Aglan, Pierre Grosser & Jacques-Olivier Boudon

January 2024

February 2023

An Atlas of Wars in the Middle Ages

Loïc Cazaux

This atlas explores military developments from the High Middle Ages to the Renaissance, comparing the West, East, and Byzantium from the 5th to 15th centuries. It examines war's impact on medieval societies, covering territorial, political, strategic, cultural, and ideological aspects.

An Atlas of Wars in the Modern Era

Olivier Aranda, Julien Guinand, Caroline Le Mao

This atlas covers three centuries of warfare, from the Italian Wars to the French Revolution, offering a global view of key battles across Europe, America, and Asia. Featuring over 200 maps and graphics, it details empires, battle plans, defense strategies, and technological innovations.

5th edition

Geopolitical Atlas of Russia

Atlas géopolitique de la Russie

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • Spring 2025

Rights sold: Japanese, Italian, Czech

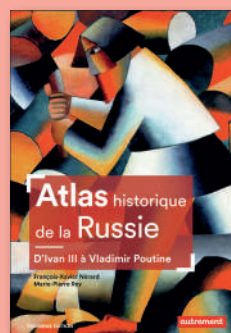

*Previous edition:
15,000 copies sold*

More than 100 maps and infographics to understand the current issues and challenges of Russia. A closer look at the strengths and weaknesses of a giant: with the war in Ukraine, the country is isolated. It seems to waver and surely turns its influence from Europe to Asia. What new world balance is the country putting in place? This atlas puts into perspective the geostrategic interests of today's Russia.

Pascal Marchand is a professor at the university of Lyon and a specialist of contemporary Russia.

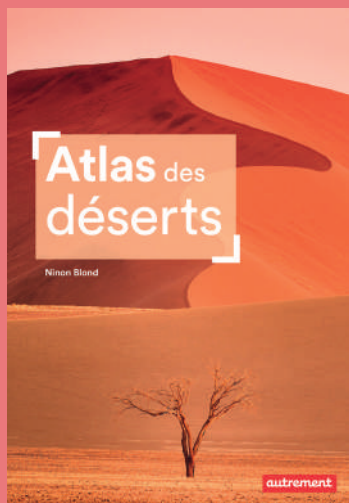

- A topic always at the heart of the news.
- **Comprehensive Coverage:** over 100 maps and infographics.

Historical Atlas of Russia

17 x 24.5 cm • 96
pages • Softcover
27,000 words approx.
24 € • February 2024

From Ivan III, the 15th-century to Vladimir Putin, Russia's current leader, this edition reviews the ongoing transformations shaping the nation.

Atlas of Deserts

Atlas des déserts

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • March 2025

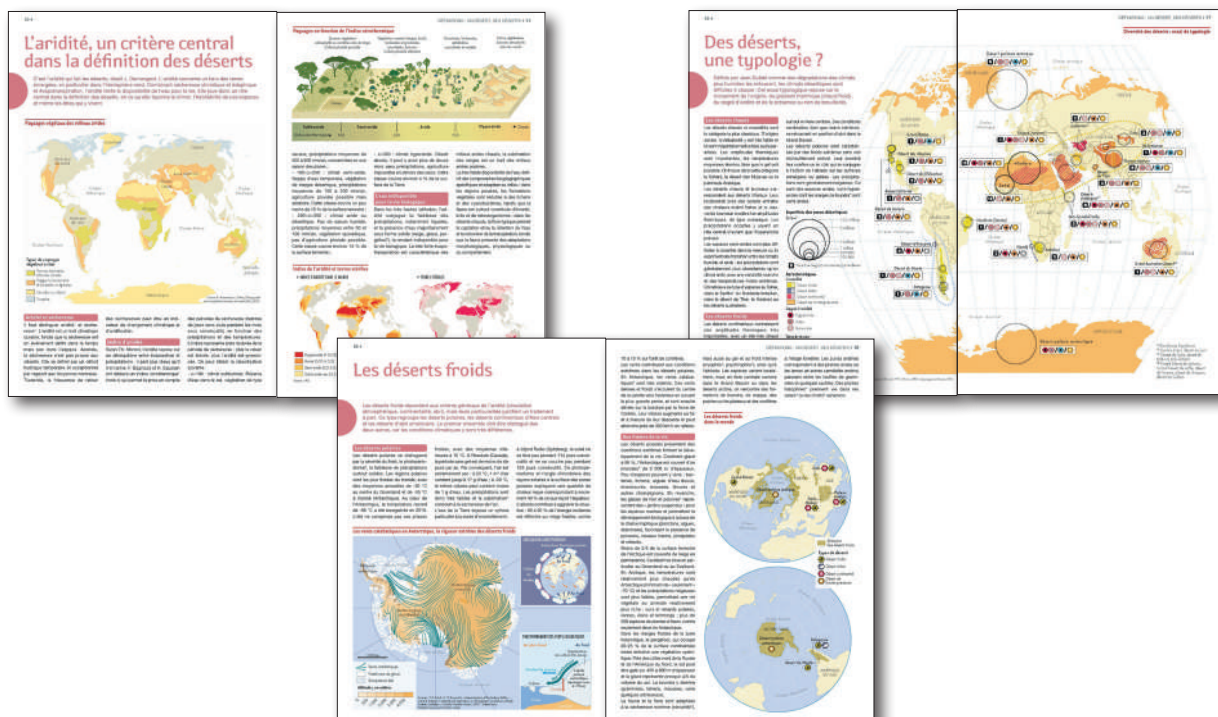

The history, life, and future of Earth's deserts – vast, resource-rich landscapes where extremes shape survival and innovation.

Sahara, Gobi, Atacama... Legendary names that fascinate and inspire. Deserts (where less than 25 cm of rain falls in a year) cover 1/5 of the earth's surface. Despite their extreme conditions, they are strategic areas, teeming with natural resources and where life develops in very specific ways.

After providing essential definitions, the author looks back at the long history of deserts, shows their recent evolution and presents their resources. She describes both the 'traditional' and the most modern ways of life, and some desert countries are resolutely looking to the future. Nearly 100 maps and illustrations, at all scales, illustrate the themes covered.

Ninon Blond is a lecturer in geography at the Ecole Normale Supérieure in Lyon. Her work combines physical and human geography, providing an understanding of the relationships between societies and environments at different spatial and temporal scales.

- Delves into the history, life, and future of Earth's deserts.
- Covers iconic deserts like the Sahara, Gobi, and Atacama, representing 1/5 of the Earth's surface.
- Features nearly 100 maps and illustrations.

27,000 words approx.
24 € • April 2025

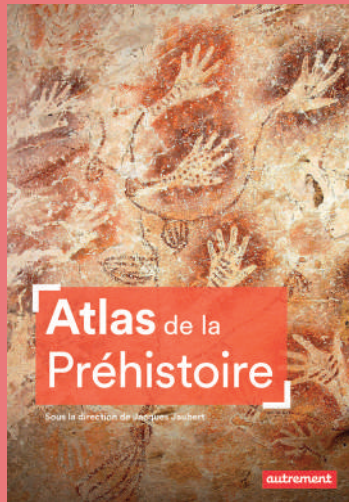

Rights sold: Japanese, Czech, Complex Chinese

In this edition, the author addresses urgent current events: new deaths in the English Channel, border closures in Germany, and more. She explores the changes in migrant routes and examines ongoing issues, such as the challenges posed by the U.S.-Mexico border.

Her aim is to challenge widespread misconceptions about migration, a topic that remains at the center of ongoing debates, including the renewed discussion of an Immigration Bill in France. Additionally, all maps and infographics have been updated, with new maps added to further enrich the edition.

Catherine Wihtol de Wenden is an emeritus professor at Sciences Po Paris and a member of the Human Rights League. A specialist in migration, she participates in numerous conferences on the topic.

- Aims to dispel widespread misconceptions about migration.
- Explores changes in migrant paths and persistent challenges, such as the U.S.-Mexico border.

Atlas of Prehistory

Atlas de la Préhistoire

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • Spring 2025

Journey through 3 million years of human history, from our earliest ancestors to the first migrations that shaped the world.

From the Australopithecines to the first migrations (from the Arctic to America, etc.), via the Neanderthals and the first Homo Sapiens, this atlas covers the period from -3.4 million years ago to -35,000 years ago.

With over 80 documents, the atlas looks back at :

- The earliest settlements (Africa)
- The diversity of humanity: Neanderthals, Denisovans and the first modern humans (Europe and Eurasia)
- The advent of undivided domination by modern man
- Asia (China and Mongolia)
- The conquest of new worlds and the first sailors.

Jacques Jaubert is a historian and archaeologist, and professor of prehistory at Bordeaux University. For this atlas, he heads a team of more than 30 teacher-researchers, all specialists in the period.

• **A unique and exclusive atlas, offering a captivating era to rediscover through maps.**

2nd edition

Atlas of Pre-Columbian America

Atlas de l'Amérique précolombienne

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • June 2025

Rights sold: Czech

This atlas invites readers to discover the **ancient civilizations that populated the Americas**, from their origins until their radical transformation and reduction by colonization:

- Mesoamerica, corresponding to present-day Mexico, where the Olmec, Maya, and Aztec civilizations developed.
- The Andes in South America, home to the Inca culture, which reached its peak before the arrival of Europeans.
- Other civilizations that evolved across vast and sometimes hostile territories, from the Arctic to Tierra del Fuego, including the Caribbean and the Amazon.

Over 120 maps, plans, documents, and original infographics reveal the variety, organization, dynamics, and exchanges of these fascinating civilizations.

Brigitte Faugère is a professor at Sorbonne 1 University and a specialist in the Maya civilization.
Nicolas Goepfert is a professor at Sorbonne 1 University and a specialist in the Inca civilization.

- Visually engaging content for history enthusiasts.
- In-depth exploration of ancient Americas civilizations.
- Over 120 maps and infographics.

2nd edition

World Atlas of Women

A Decline in Inequality?

Atlas mondial des femmes.
Un recul des inégalités ?

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • October 2024

Rights sold: Japanese

Previous edition:
6,000 copies sold

In the wake of the #MeToo revolution and the rise of feminist movements gaining more prominence, this atlas, with over 120 maps, provides an in-depth examination of women's conditions around the world, highlighting stark contrasts. What are the advancements and obstacles?

- Is the right for women to have control over their own bodies truly secured?
- While women's private lives have changed, they still face persistent stereotypes.
- What is the impact of gender parity laws and the liberation of speech?

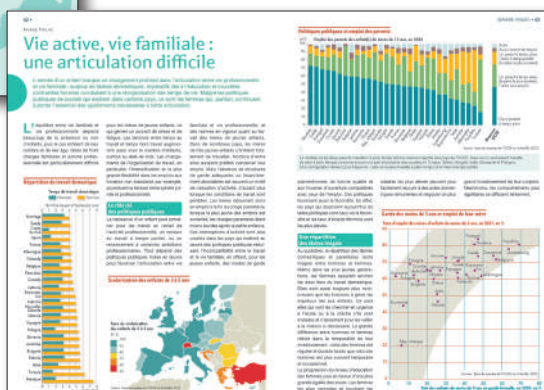

Fully updated, the atlas objectively and comprehensively highlights the progress and paradoxes of women's conditions without bias or complacency.

Isabelle Attané is a research director at the CNRS (National Scientific Research Centre).

Carole Brugeilles is a professor at Nanterre university.

Wilfried Raud is a research director at the CNRS. Together they coordinated a team of about thirty specialists to write this atlas.

- Reflects latest data and trends.
- Inspires advocacy and change.

4th edition

Atlas of the Palestinians

A People in Search of a State

Atlas des Palestiniens. *Un peuple en quête d'un État*

17 x 24.5 cm • 96 pages • Softcover
27,000 words approx.
24 € • February 2025

120 updated maps and infographics to understand the history of a people and the dynamics of a complex conflict reactivated since the October 7, 2023 attack.

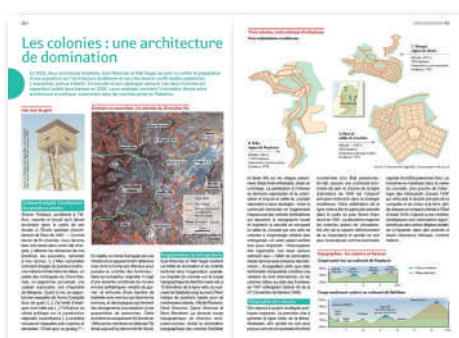

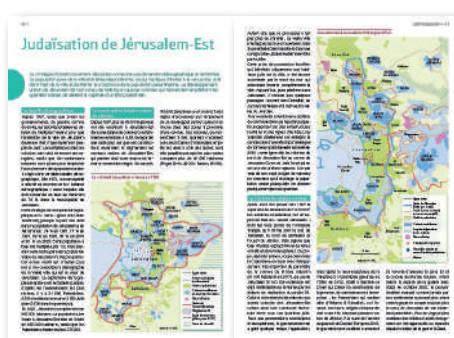

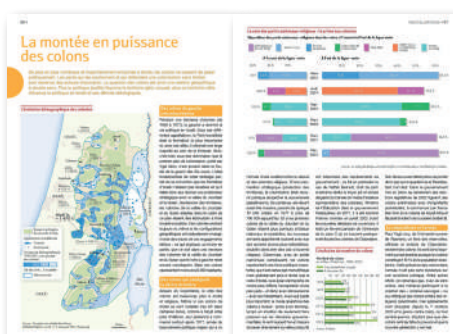

- The history of the Palestinians since the 19th century
- Political representation, demographics: a society mostly condemned to precariousness
- A fragmented territory, divided by the wall, fragmented by settlements
- A divisive situation beyond regional borders

What future for the Palestinian people? What will become of Gaza?
How can the region and neighboring states respond?

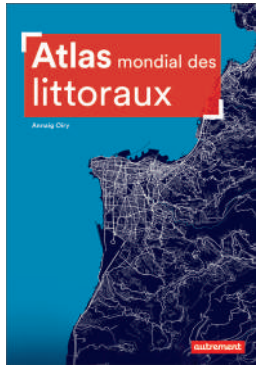

Pierre Blanc is a professor and researcher at Sciences Po Bordeaux. He is the editor-in-chief of the journal *Confluences Méditerranée*.

Jean-Paul Chagnollaud is a professor emeritus and president of the Institute for Mediterranean Research and Studies.

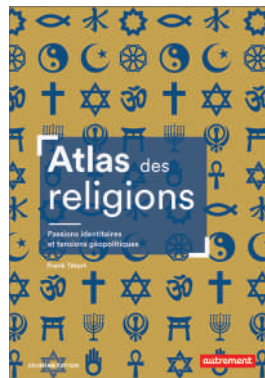

- The complex history of the Palestinian people.
- Exploration of the current situation and potential future for Gaza.
- In-depth analysis of political, demographic, and territorial challenges since the 19th century.
